Waste Water Comprehensive Plan Amendment

The City Engineering Department is proposing an amendment to the current Waste Water Comprehensive plan at the request of the property owner to provide sewer service for a proposed single family development, described as parcel numbers 0221172115 and 0221172076. The referenced document shows that the property is designated in C-7 basin. Mr. Tallman's representatives have approached the City about amending the ULID #2 Basin line to include the above described properties. Hammond Collier Consulting Engineers will prepare a scope and fee to review the proposal. The basic parameters of the review will include:

- Amending the current ULID #2 Boundary line to include the above parcels.
- Capacity study of the existing sewer line in 34th Street and adjoining sewer infrastructure.
- Generation of sewerage flow calculations of the additional parcels.
- Analysis of the proposed conveyance system.
- Preparation of a written report with supporting technical data and recommendations.
