2. A determination that failure to grant the variance would result in exceptional hardship by rendering the lot undevelopable.

3. A determination that granting of a variance will not result in increased flood heights, additional threats to public safety, extraordinary public expense, nor create nuisances, cause fraud on or victimization of the public, or conflict with existing local laws or ordinances.
4. A determination that the variance is the minimum necessary to afford relief, considering the flood hazard.
5. Submission to the applicant of written notice specifying the difference between the design flood elevation and the elevation to which the building is to be built, stating that the cost of flood insurance will be commensurate with the increased risk resulting from the reduced floor elevation, and stating that construction below the design flood elevation increases risks to life and property.

If, after a reasonable search and reasonable efforts are made to obtain service, the whereabouts of the person(s) is unknown or service cannot be accomplished and the building official/fire marshal makes an affidavit to that effect, then service of the notice upon such person(s) may be made by:

The emergency order shall specify the time for compliance and shall be posted in a conspicuous place on the property, if posting is physically possible. A failure to comply with an emergency order shall constitute a violation of this chapter. Any condition described in the emergency order which is not corrected within the time specified is hereby declared to be a public nuisance and the building official/fire marshal is authorized to abate such nuisance summarily by such means as may be available.
